Quiz Instructions

Question 1

5 pts

What is the sequence of states visited when accepting the string *abaaa* in the following DFA (which is Figure 2–16 in the book)?

q0, , , , ,

Question 2**5 pts**

What sequence of states will accept *abaab* in Figure 2-17 (repeated below)?

q0,

,

,

,

,

Question 3**4 pts**

Which states are in the lambda closure of q0 in the NFA below?

☐ q0☐ q1☐ q2☐ q3☐ q4

The four questions that follow pertain to converting the NFA using the alphabet $\Sigma = \{0, 1\}$ represented by the following transition table to a DFA (note the lambda transition from q0 to q1):

	0	1	λ
q0	ϕ	q1	q1
q1	q2	ϕ	ϕ
q2	ϕ	q1	ϕ

Question 4**2 pts**

Which states comprise the composite initial state during the conversion from NFA to DFA?

☐ q0☐ q1☐ q2**Question 5****2 pts**

Which state(s) are reachable from the composite start state mentioned in the previous question with the input symbol 0?

☐ q0☐ q1☐ q2**Question 6****2 pts**

Which state(s) are reachable from the composite start state in question #4 with the input symbol 1?

☐ q0

☐ q1

☐ q2

Question 7

2 pts

When the conversion process is complete, how many states are in the resulting DFA?

☐ 3

☐ 4

☐ 5

☐ 6
